Terms are 1%, 10 days, net 30 days from date of invoice.

VERSTEEL®

Warranty

All table and seating products manufactured by Versteel, are guaranteed by a Lifetime Warranty against defects in materials and workmanship from the date of purchase.

Electrical items manufactured by Versteel are guaranteed against defect for a period of five (5) years from date of purchase.

Electrical items not manufactured by Versteel are covered by the manufacturers under their specified warranty.

Consumables such as gas cylinders, casters and glides are covered for a period of one (1) year. Versteel will not cover labor costs associated with replacing the casters or glides.

Wood veneer is warranted for a period of ten (10) years. Natural variations in grain, color or texture of wood should not be construed as defects under this warranty.

Versteel will replace or repair (at our discretion) without cost to our customers any item manufactured by Versteel found to be defective as a result of defective material or workmanship. We will not, however, repair any item which is not properly installed, abused or subject to any use other than that which was originally intended. The warranty does not cover normal wear and tear of the product, which is expected over the course of ownership. Any repairs by the customer must receive specific written authorization from Versteel before being executed on location to receive proper reimbursement for associated costs. In no event shall liability under this warranty exceed the original purchase price.

Warranty on plastic laminates and upholstery is not covered by Versteel but is covered by laminate and textile manufacturers under their specified warranty only. All foams, fabrics and vinyls are prone to stretch and loosen over time through normal use. This natural effect, called puddling is covered for a period of one (1) year from the date of purchase.

There are no other warranties expressed or implied.

Care of Laminate Surfaces, T-Mold, Bumper, PVC Edges and Urethane

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface, moving with the pattern and follow with a clean, dry soft cloth. When a wood edge exists, follow instructions found under "Care of Wood Edges and Veneer Surfaces" for edge.

Care of Wood Edges and Veneer Surfaces

Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

For an additional safeguard, use a protective surface pad. Doing so could ensure a lasting finish by protecting your furniture from possible damage caused by pens and sharp objects.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Care of Powder Coat and Nickel Surfaces

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Care of Chrome Bases

Clean with a wet cloth or window cleaner. For scuff marks or heavy soiling, a non-abrasive automotive chrome polish can be applied as directed.

Maintenance of Mechanical Parts

Clean any lint or debris from the moving parts of the E-Z install tilt or folding base mechanisms. Do not apply lubricant. Mechanisms have been designed and tested to not require lubrication under normal conditions.

Care of Upholstered Tack Panels

For Versteel standard fabrics and vinyls, consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Objective

It is the objective of Versteel to adhere to Federal, State and local laws and codes, ordinances and regulations as may be applicable to control environmental risks, prevent harm to the public health and welfare, and to preserve our natural resources. Versteel acknowledges the necessity of commitment and hereby commits its resources of all levels of its management and all employees of the company to accomplish this objective.

Policy Statement

Each Versteel facility has the responsibility to:

Develop environmental policies which implement regulatory compliance requirements and provide management guidance and support with applicable environmental laws.

Train and motivate personnel to work in an environmentally acceptable manner and to understand and comply with government regulations within the scope of Versteel operations.

Communicate the importance of personal responsibility protection to all employees through formal training. Each employee will be aware of the environmental regulations applicable to their job functions, including limitations and functional restrictions of permits, spill control, emergency response actions, proper waste handling procedures, etc.

Communicate and continually assess relevant environmental developments on operations of the facilities and personnel.

Require sub-contractors or contractors (third parties working for, with, or on behalf of Versteel) to follow Versteel's environmental procedures while working within their facilities.

Make responsible personnel available at all times to carry out environmental procedures, especially under emergency situations.

Apply sound management practices and operating procedures.

Implement appropriate control technologies and process guidelines for preventive and corrective maintenance systems to minimize actual and potential environmental harm and exposures.

Communicate effectively with government and the public regarding serious environmental incidents should they ever occur.

Minimize the generation, emission or discharge of waste, and harmful or regulated substances and pollutants from operations to the extent most practical with laws and regulations. Ensure proper disposal of all waste.

Substitute materials or processes to allow the use of less hazardous substances where feasible.

Secure and maintain all environmental permits required for operation. Maintain up-to-date files of all environmental reporting requirements and make this information available for easy access at each operating facility.

Evaluate the causes behind any serious environmental incidents and establish procedures to avoid recurrence.

There is a sincere effort at Versteel to maintain our responsibility to the environment and to our employees. We are mindful of the effectiveness and improvements required to ensure environmentally safe conditions and to preserve our natural resources.

We pride ourselves on exceeding the standards set forth by federal, state and local codes.

Our electroplating plant consistently earns local annual environmental awards, and all of our products have met the requirements for Intertek Green Leaf VOC/VOC+ certification.

At Versteel, we feel it is our responsibility as a manufacturer to build products in a manner that promotes a safe and healthy environment for everyone. We maintain detailed information regarding the environmental impact of all Versteel products. If you have questions regarding our environmental policy or would like more information, please contact Versteel Customer Service at 800.876.2120.

Base Construction
Versteel bases are constructed of a column, base and a mounting top plate in many styles and sizes.

1) Mounting top plates attach to the column to allow attachment to the top.

FIXED BASES
Fixed bases feature a heavy gauge plate and are field installed into marked pre-drilled positions on the top with hardware provided.

TILT BASES
The 10 gauge upper plate is factory installed on the table top. The 7 gauge lower formed plate is attached to the base column.

FOLDING BASES
Folding bases feature a formed pan with welded construction that is connected to a wire formed frame. The wire formed frame acts as stacking bumpers and carrying handles for the table. Bases can be field installed into marked pre-drilled positions with provided hardware or request the option for factory installation.

2) Columns are constructed of 16 or 14 gauge tubular steel in a variety of shapes and diameters appropriate to the series and base styles.

3) Base rails, feet or discs attach to the column and are heavy gauge steel to create a very stable table with glides to provide ¾" vertical adjustment for leveling the table.

Base Shipping Specifications
All Series TC, T1, T2 bases, W2, P3, P4 columns and D1 disc base ship assembled from the factory. Brattice, Uno and Vela Series X1 and X4 bases and Vela Y3 base also ship assembled from the factory. Performance and Tuscany Series X1 and X4 bases ship KD for field assembly.

Quality Standards
All Versteel table bases are constructed to pass the industry test standards set forth by BIFMA. For more detailed specifications by series and base style, contact Versteel Customer Service at 800.876.2120.

Reference Table Heights
Tables can be specified at many different heights based on your application needs. Standard Versteel tables are 29" from the floor to the table surface. The Interplay Rover™ Pup is 26 ¾" from the floor to the surface for use as a pull-up typing surface or can roll under most surfaces to store out of the way.

Suggested typing height table is 26 ¾"
Suggested wheelchair height table is 32"
Suggested counter height table is 36"
Suggested stand up height table is 42"

TIM Base Construction

TIM table bases are constructed of 14 gauge round tube upper legs with 16 gauge round tube telescoping height adjustment lower leg sections. Guide bushings inside the legs are molded from nylon bushing materials to provide smooth, quiet operation of the height adjustment feature. The height adjustment button is made of solid steel with a spring actuated movement. A Height Adjustment Lock Out Kit is available if you wish to lock out the push-button height adjustment feature.

FIXED BASES

Fixed bases feature a $\frac{1}{4}$" thick mounting top plate and are field installed into pre-drilled holes with hardware provided. TIM tables with fixed bases include the push-button height adjustment feature.

NOTE *FIXED BASES ARE SHIPPED SEPARATE FROM THE TOP AND ONLY REQUIRE SCREW ATTACHMENT TO ASSEMBLE*

TILT-NEST-FOLD BASES

Tilt feature is cable actuated with the pull of a release handle located under the table top on the end of the surface. The cable operates two brake control mechanisms mounted on each end of the table to support the top. Nest-fold features are constructed of die cast metal components and 14 gauge round tube, fully enclosed in reinforced plastic housings for smooth, quiet operation.

NOTE *THE TABLE IS SHIPPED FACTORY ASSEMBLED FOR IMMEDIATE USE AFTER UNCARTONING*

Reference Table Heights

TIM tables are constructed with push-button height adjustment to provide five inches of vertical movement. The top leg hole position will set the surface height at 27" with the third from the top hole for 29" standard seated task, and the bottom round hole providing the 32" surface height required for wheelchair applications. The adjustment holes are at 1" spacing increments.

TIM Meeting Base Construction

TIM Meeting table bases are constructed of 14 gauge round tube with $\frac{5}{16}$" solid rod and 16 gauge round tube cross supports.

STERN BASES

Stern bases feature a formed two-piece tilt mechanism. The 10 gauge upper plate and the 7 gauge lower formed plate are welded to the base column. A spring activated self-locking latch mechanism holds the two sections together in the closed position and acts as a safety latch to hold the top in position when tilted up.

NOTE *STERN BASES ARE SHIPPED SEPARATE FROM THE TOP AND ONLY REQUIRE SCREW ATTACHMENTS TO ASSEMBLE*

Reference Table Heights

TIM Meeting tables are constructed at standard 29" table height.

VERSTEEL ®

ETL Intertek

Laminate and Veneer, Standard Core Construction

The standard top construction consists of 45-50 lb. particleboard, surfaced with a high pressure laminate or veneer face. A backer sheet is laminated to the under side of the top. Tops are shipped pre-drilled for field installation of bases and accessories.

Laminate, Lightweight Core Construction

Lightweight core is a multi-ply birch plywood, with a density of around 28 lbs. per cubic ft., offering a 30% – 35% weight reduction for a typical table vs. standard core. The tops are surfaced with a high pressure laminate or veneer face. A backer sheet is laminated to the under side of the top, and tops are shipped pre-drilled for field installation of bases and accessories.

The lightweight plywood construction allows for mounting of bases or other accessories at any location under the top.
Lightweight core is available as an option for tops that are no larger than 48" x 96".

NOTE *LIGHTWEIGHT TOPS LARGER THAN 48" X 96" REQUIRE A SPECIAL QUOTE. CONTACT VERSTEEL FOR PRICING AND AVAILABILITY*

Alternate Core Construction

Alternate core constructions are available, including medium density fiberboard (MDF), honeycomb cores, and cores that contain no urea formaldehyde. Contact Versteel for pricing and availability.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with $\frac{1}{8}$" radius at the top and bottom. Corners with 1 $\frac{1}{2}$" radius or square corners are available on $\frac{7}{8}$", 1 $\frac{1}{4}$" or 1 $\frac{3}{4}$" edge thicknesses.
Offered in twenty (20) standard colors.

Convex T-Mold Edge

Edge of $\frac{5}{16}$" thick solid vinyl convex t-mold with 1 $\frac{1}{2}$" radius corners on $\frac{7}{8}$", 1 $\frac{1}{4}$" or 1 $\frac{3}{4}$" edge thicknesses.
Offered in four (4) standard colors.

Wood Flat or Fluted Edge - 3 mm

Edge of 3mm wood multi-ply banding hot melt banded to the top with $\frac{1}{8}$" radius at the top and bottom. Corners with 1 $\frac{1}{2}$" radius or square corners are available on $\frac{7}{8}$" and 1 $\frac{1}{4}$" edge thicknesses.
Offered in Maple, Walnut or Cherry materials.

Bumper Edge

Exposed ply core banding with rubberized $\frac{5}{8}$" width bumper in the center of profile. Corners with 1 $\frac{1}{2}$" radius are available on $\frac{7}{8}$" and 1 $\frac{1}{4}$" edge thicknesses.
Offered in black bumper standard color.

Wood Square or Fluted Edge - 1 $\frac{1}{4}$"

Edge of 1 $\frac{1}{4}$" wide solid wood with softened top and bottom edges, and square, softened mitered corners. Available on $\frac{7}{8}$", 1 $\frac{1}{4}$" and 1 $\frac{3}{4}$" edge thicknesses.
Offered in Maple, Walnut or Cherry materials.

Wood Bullnose Edge - 1 $\frac{1}{4}$"

Edge of 1 $\frac{1}{4}$" wide solid wood with a full bullnose edge, and 1" radius mitered corners. Available on $\frac{7}{8}$", 1 $\frac{1}{4}$" and 1 $\frac{3}{4}$" edge thicknesses.
Offered in Maple, Walnut or Cherry materials.

Wood Reverse Bevel Edge - 2"

Edge of 2″ wide solid wood designed with a reverse sloped edge on one side and a 3mm flat wood edge on the remaining three sides for all Entourage cabinets. When specified on Elements Conference the reverse bevel detail will be on all four sides with mitered corners. Available on 1 $\frac{1}{4}$" edge thicknesses.
Offered in Maple, Walnut or Cherry materials.

Wood Ergo Edge - 1 $\frac{3}{4}$" or 2 $\frac{1}{2}$"

Edge of 1 $\frac{3}{4}$" wide (on $\frac{7}{8}$" thick tops) or 2 $\frac{1}{2}$" wide (on 1 $\frac{1}{4}$" thick tops) solid wood designed with a sloped edge for added comfort with softened, mitered corners.
Offered in Maple, Walnut or Cherry materials.

Urethane Ergo Edge (User Side) - 1 $\frac{3}{4}$"

Edge of 1 $\frac{3}{4}$" wide molded urethane designed with a sloped ergonomic edge on one side and a $\frac{1}{4}$" wide square urethane edge on the remaining three sides. Corners are square. Available on $\frac{7}{8}$" edge thicknesses.
Offered in five (5) standard colors.

Urethane/PVC Ergo Edge (User Side) - 1 $\frac{3}{4}$" & PVC

Edge of 1 $\frac{3}{4}$" wide molded urethane designed with a sloped ergonomic edge on one side and a 3mm PVC flat edge on the remaining sides. PVC corners are available in square or radius on $\frac{7}{8}$" and 1 $\frac{1}{4}$" edge thicknesses.
Urethane offered in five (5) colors with matching PVC colors.

Laminate Modesty, General Core Construction

The modesty panel is constructed of ¾" thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. The modesty panel is 8" high on Vela and 10" high on Brattice and Performance series and extends the length of the top. The modesty panel is located along the front edge of the table for maximum leg and knee clearance.

Fixed Modesty (FixMod XM)

The Fixed Modesty panel is mounted to the top with screws through steel brackets and must be field installed into pre-drilled positions in the top. All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

Removable Modesty (RemMod RM)

The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Finish details match the top unless specified differently.

Folding Modesty (FoldMod FM)

The Folding Modesty panel is mounted to the top with heavy duty hinge assemblies. A sliding brace supports the modesty panel in the set-up position and also holds the modesty panel in place in the stored position. Finish details match the top unless specified differently.

Form Metal Modesty, General Construction

The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top on Brattice, Performance and Vela. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

NOTE *RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED*

Fixed Form Modesty (FixFormMod XF or XFS)

The Fixed Form Modesty panel is mounted to the top with screws through steel brackets. The fixed modesty panel must be field installed into pre-drilled positions in the top. All mounting hardware is packed with the modesty panel. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE *RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED*
NOTE *XFS INDICATES SQUARE MODESTY CONSTRUCTION WITH SQUARE HOLES*

Folding Form Modesty (FoldFormMod FF)

The Folding Form Modesty panel is mounted to the top with heavy duty steel hinge assemblies. A sliding brace supports the modesty panel in the set-up position and also holds the modesty panel in place in the stored position. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE *RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED*

Fixed Lightweight Form Modesty (FixLightweightFormMod XL or XLS)

The Fixed Lightweight Form Modesty panel is a lightweight version of the Versteel Form Modesty. It is a formed steel perforated panel that is mounted to the top with screws through steel brackets. It must be field installed into pre-drilled positions in the top. A deep channel in the back of the panel allows for the routing of power and data cables inside of the modesty. Mounting hardware is packed with the modesty panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

Hanging Modesty (HangMod HM)

The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. Finish details match the top unless specified differently.

Removable Lightweight Form Modesty (RemLightweightFormMod RL or RLS)

The Removable Lightweight Form Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to secure the modesty in position, or loosen them to remove the panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

NOTE RLS INDICATES SQUARE MODESTY CONSTRUCTION WITH SQUARE HOLES

Panel Modesty (MPL and MPV)

The Panel Modesty is constructed of ⅛" hardboard core with laminate or veneer face and back surfaces, machined with exposed edges. Panel Modesty can be specified on both fixed and tilt-nest-fold base tables and will swing out to nest on the table. The 8 ½" high Panel Modesty is field mounted with hook brackets, installed with handwheels under the table top. Threaded inserts are installed in the top when Panel Modesty is specified with the table. Panel Modesty shapes complement the rectangle and arc rectangle top shapes. Finish details match the top unless specified differently.

Sail Modesty (MS__)

AVAILABLE ON TIM ONLY

The Sail Modesty panel is constructed of Lycra® fabric hooked into slotted holes on the table legs then stretched and hooked over pegs on the under surface of the table top. Sail Modesty panels can be specified on both fixed and tilt-nest-fold base tables and can be stored on table when tilted, nested or folded on table transport. All TIM tables are pre-drilled for the field installation of the Sail Modesty. Top pegs are installed when Sail Modesty is specified with the table. Sail Modesty is available in coordinating colors of Alabaster, Alloy, Ebony and Frost.

These configurations suggest a few of the possible configurations that can be created with the available TIM Meeting shapes.

TIM
Configuration

In response to the ever changing workplace, Versteel offers the versatile TIM table. TIM is available with adjustable legs for alternate heights, a tilting mechanism for nesting and a flat-folding feature for transport storage. Mobile and adaptable, the TIM table is your best choice for today's multitasking environments. Training for two or twenty, configurations can be created by combining table shapes with no effort. The diagrams above are but a few examples of the many possible TIM arrangements.

Storage

The illustrations listed on page 19 show the specific nested dimensions for all TIM tables. Dimensions are exact to the best of our knowledge. TIM tables may nest in any quantity and are intended to store in a nested position without the support of the available transport. The transport can be used to store TIM in a flat folded position or to relocate a large group of tables with ease. Tables can store with all power options and modesty panels in place.

Linking

Linking options require no additional space or storage requirements. TIM tables link with Leash - Table Link system (TLS). The Leash is a casual, quick linking system that simply holds the tables in position to each other. All TIM tables with electrical capabilities ship with the Leash.

TIM Meeting
Configuration

Meeting scenarios vary greatly. Conferencing configurations can be created by combining the conference and stern top shapes and with no effort, each table can roll into storage areas. The diagrams above are but a few examples of the many possible TIM Meeting arrangements.

Storage

The illustrations listed on page 19 show the specific nested dimensions for all TIM tables that fold and nest. Dimensions are exact to the best of our knowledge. TIM Meeting Stern tables may nest in any quantity and are intended to store without the support of a cart or transport. The standard locking casters provided with TIM tables assure stability while stored or in use. Tables can store with power options in place. Casters are made of a non-marking wheel material.

Linking

Linking options create no additional space or storage requirements. TIM Meeting tables link with the available Table Link system (TLK). The linking system allows for the prevention of incidental movement and will prevent accidental disconnection of any power supply to additionally linked tables.

Fixed Configuration Conference Tops

Conference tops may use fixed configurations to achieve larger than normal sizing and seating accommodations, but there are some specific items that must be considered. These large conference tops are generally greater than 60" wide and 240" long.

By contacting Versteel with your vision we can help you engineer and produce your table. Below is a list of important points we will address.

MATERIAL YIELD

Most laminate is available in a maximum sheet size of 60" x 144". Versteel can design shapes and linking configurations that will maximize material yield.

LAMINATE PATTERNS

Versteel can minimize seam lines by designing and positioning the linking configuration to take full advantage of your laminate pattern.

BASES AND JOINTS

Larger sections can be produced to limit the number of bases and joints required.

At right is a typical Versteel drawing of a large, fixed configuration conference table. The extremely large size (504" x 132") required nine (9) sections and twenty-seven (27) bases. Power and data options have been incorporated into the drawing.

Configuration Guidelines

Often we receive requests to assemble room configurations that one would assume are very easy. But without the proper input, it is not so simple. Below are some common questions that will help to define your needs as well as enable us to help you specify your tables.

Define Your Space

Start by asking yourself what you really want to accomplish in your room.

How will your room be used? Will you need breakout groups, is it a classroom with rows, or a boardroom? Do you need a T-shape, U-shape, or hollow square table group? Are there any special modifications that are specific to your application?

Besides the size of your room, here are some other items that you should take into consideration:

¬ instructor or speaker area

¬ wall with boards and/or audiovisual equipment

¬ door and window locations

¬ anything else which may interfere
(columns, steps, ramps, HVAC, etc,)

Define Your Needs

Your table considerations should begin by thinking about the need for the following items:

¬ modesty panels

¬ linking

¬ power and data

¬ wire management and grommets

¬ keyboard trays

¬ fixed, folding or tilt bases

¬ special needs (alternate or adjustable height)

Your seating considerations should begin by thinking about the need for the following items:

¬ assume a 30" width per person

¬ mobility (casters)

¬ stacking or storage issues

¬ usage and wear (upholstery or wood)

¬ adjustable height

¬ function (task specific or multiple)

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

Common Room Layout Guidelines

By using the guidelines below and the information that you supply (from answering the previous questions), Versteel can help you specify the tables and seating you need to make your space function at its maximum potential.

Between Rows Allow Four Feet (4')

If rows are used, four feet (4') between rows is considered adequate in order to provide space for movement.

Instructor Allowance of Eight - Ten Feet (8'-10')

A minimum of eight to ten feet (8' -10') should be allowed for the instructor's space, from the wall to the approach side of the first table row.

Back Wall Allowance of Seven Feet (7')

Space consideration for the back wall is necessary. A minimum of seven feet (7') from the back wall to the user's side of the last table is suggested.

Side Wall Allowance of Four Feet (4')

A minimum of four feet (4') from a side wall to the edge of a table should be incorporated into your configuration. Increase the distance for larger rooms.

Aisle Allowance of Four Feet (4')

If an aisle is needed, allow a minimum of four feet (4'). This dimension should increase with your room size.

The drawing below illustrates the guidelines above.

Common Seating Dimension Requirements

General spacing of thirty inches (30") of lateral space per chair at a table is standard. A minimum of twenty-four inches (24") may work, but will depend upon your chair style and table dimensions. Allow a minimum of thirty to thirty-six inches (30"-36") for wheelchair space at a table.

Most wheelchairs are designed to fit beneath a standard table with a twenty-nine inch (29") table top height. However, some wheelchairs require tables with tops at thirty-two inches (32") in height. Allow an additional twelve to eighteen inches (12"-18") in aisles where wheelchairs may be situated back to back.

A rule of thumb for cafeteria style seating is to allow a minimum of twelve square feet (12 ft^2) for each seat.

Since every space has its own unique size and function, it is important that you consider the aforementioned guidelines when planning your space. Be sure to allow adequate space for aisles and plan your rooms around walls and other permanent fixtures such as doors or windows. Anticipate the type of activity that will be going on and plan enough space at the table for easy movement of personnel when seated.

Don't forget to consider power and data needs also. For help planning and selecting the power and data options that are right for your space, see pages 54-68.

Alternate Black Caster
No Charge

*Specify code **BCB** (Alternate Black Caster) no additional charge*

Available on all Entourage units that have casters (carts, lecterns, 48" and 60" cabinets) where the standard two-tone silver/black caster is replaced with an all black caster. This 3" diameter caster is standard locking and does not change the overall height of the unit.

Base Glides
Subtract $32

*Specify code **BG2** (Glides), subtract $32.00 list per table*

Base Glides replace standard casters. This option reduces the overall table cost and keeps the tables in position without the need to lock the casters. Base glides reduce the overall table height by $\frac{9}{16}$".

Casters - Dual Wheel
$107 / set of 4

*Specify code **BCD** (Casters - Dual Wheel), add $107.00 list per table*

Dual Wheel, black, 2" diameter, standard locking casters are available for most base styles. Each is fitted into a reinforced caster receiver and must be specified at time of order. Caster option does not change the overall height of the table.

NOTE *NOT AVAILABLE ON D1 BASES*

Casters - Vela Wheel
$107 / set of 4

*Specify code **BCV** (Casters - Vela Wheel), add $107.00 list per table*

Unique, Vela-profile 3" diameter, standard locking casters are available on most Interplay and Vela base styles. Each is fitted into a reinforced caster receiver and must be specified at time of order. Caster option does not change the overall height of the table.

Mix - Dual Wheel Casters & Glides
$101 / table

*Specify code **BMD** (Mix - Dual Wheel Casters & Glides), add $101.00 list per table*

Tables can be specified with dual wheel, black, 2" diameter, standard locking casters on half of the table, with glides on the other half. Each caster is fitted into a reinforced receiver and must be specified at time of order. Mix option does not change the overall height of the table.

NOTE *NOT AVAILABLE ON X1, X4 OR D1 BASES*

Mix - Vela Wheel Casters & Glides
$101 / table

*Specify code **BMV** (Mix - Vela Wheel Casters & Glides), add $101.00 list per table*

Tables can be specified with the unique, Vela-profile 3" diameter, standard locking casters on half of the table, with glides on the other half. Each is fitted into a reinforced caster receiver and must be specified at time of order. Mix option does not change the overall height of the table.

NOTE *NOT AVAILABLE ON X1, X4 OR Y3 BASES*

Self-Leveling Glides
$29 / table

*Specify code **BLG** (Self-Leveling Glides), add $29.00 list per table*

Self-Leveling Glides replace standard glides. This option allows the table to automatically compensate up to $\frac{1}{2}$" for floors that are not level. Self-leveling glides increase overall table height by $\frac{3}{4}$".

Table Floor Mount
$34 / table

*Specify code **BFB** (Table Floor Mount Bracket Set), add $34.00 list per table*

Bracket to slip over the standard table glide and fasten to the floor with fasteners supplied by the installer. Set of four (4) brackets will securely mount the table to the floor to prevent movement.

Custom PVC Color Match
Call for quotation / one time charge per color, per order

*Specify code **OCP** (Custom PVC Color Match), add cost from Versteel quotation*

PVC Color Match can be the selection of a color that is available from a Versteel supplier or a new custom color developed for the order. Minimum footage requirements mean that the amount of material needed for your order will effect the cost.

For PVC Color Matching you must supply a color reference sample. Versteel will review the sample for possible existing colors available and send a sample for customer approval. If no color match exists, a custom match will be developed and sampled for customer approval before a production schedule is established.

NOTE *CUSTOM COLOR MATCHING APPROVALS MAY AFFECT STANDARD PRODUCTION SCHEDULES*

Custom T-Mold Color Match
Call for quotation / one time charge per color, per order

*Specify code **OCT** (Custom T-Mold Color Match), add cost from Versteel quotation*

T-Mold Color Match can be the selection of a color that is available from a Versteel supplier or a new custom color developed for the order. Minimum footage requirements mean that the amount of material needed for your order will effect the cost.

For T-Mold Color Matching you must supply a color reference sample. Versteel will review the sample for possible existing colors available and send a sample for customer approval. If no color match exists, a custom match will be developed and sampled for customer approval before a production schedule is established.

NOTE *CUSTOM COLOR MATCHING APPROVALS MAY AFFECT STANDARD PRODUCTION SCHEDULES*

Powder Coat Alternative
Call for quotation

*Specify code **OPA** (Powder Coat Alternative), add cost from Versteel quotation*

Powder Coat Alternative is available from Versteel. The entire RAL color reference along with hundreds of other colors and finishes are available.

For Powder Coat Alternative matching, you must supply a color reference sample, or an RAL number. Versteel will review the sample for possible existing colors available and send a sample for customer approval. If no color match exists, a custom match can be developed. Call Versteel Customer Service for associated upcharges on custom color development.

NOTE *CUSTOM COLOR MATCHING APPROVALS MAY AFFECT STANDARD PRODUCTION SCHEDULES*

Stain Finish Match
$639 / one time charge per finish, per order

*Specify code **OSM** (Stain Finish Match), add $639.00 list per finish, per order*

Alternative Stain Finishes are available for veneer and wood edged tops.

For Stain Finish Matching you must supply a 4" x 4" finish color and grain reference sample. An expertly finish matched sample will be provided for customer approval.

NOTE *CUSTOM COLOR MATCHING APPROVALS MAY AFFECT STANDARD PRODUCTION SCHEDULES*

Veneer and Wood Solids Alternative
Call for quotation

For veneer and wood requirements other than the standard cherry, maple and walnut, contact Versteel Customer Service. Versteel is adept at working with a host of domestic and exotic materials. From inlays, figures, pie cuts and special edge profiles, to custom fill levels and sheens, each top is created using the best of technology and old world craftsmanship. The items you only imagined or expected to only be available from a millwork shop are now just another part of your Versteel order. Call Versteel Customer Service for availability and quotation.

Wood Finish Alternative
Call for quotation

When veneer tables are required to have a finish other than the standard open pore level, semi-filled or full-filled finishes are available by requesting a quote from Versteel. Call Versteel Customer Service for availability and quotation.

Resin Edge Material Alternative
Call for quotation

GLOSS
Seamless, rigid, blended resin edge with a hand polished high gloss finish.

SATIN
Seamless, semi-rigid, blended resin edge with a hand sanded satin finish. Scuffs, scratches and surface damage to the edge are field repairable.

SATIN-SOFT
Seamless, pliable, blended resin edge with a hand sanded finish. The features are memory and pliability. Scuffs, scratches and surface damage to the edge are field repairable.

Call Versteel Customer Service for availability and quotation.

Glass Top Table Alternative
Call for quotation

Versteel glass top tables meet or exceed government specification DDG-451d, which regulates the quality standards of all glass manufacturing. This specification takes into consideration certain imperfections inherent in glass production. Due to the very custom nature of glass tables, the offering does not appear in this price list but is available from Versteel. Call Versteel Customer Service for availability and quotation.

Essential Information

Like space planning with room configurations, we often receive requests to create power and data needs that one would assume are very easy. Below are some common questions that will help to define your needs and in turn will enable us to help you specify your tables.

Which Solution Best Fits Your Needs

Ask yourself some basic questions to help define your specific needs.

Is storage an issue? Some tables may be folded or tilted with certain power and data sources in position, while others may require that the power and data source be removed for these functions. Make sure you consider the space that you will need to store all the parts of your configurations.

Will you be moving your tables? If your tables are going to be utilized in varied locations, you will want to ensure that you can easily disconnect and reconnect your power and data. Table Link - Ends Only is included with Henri and Powerlink electrical package options to prevent the accidental disconnection of power supply to adjacent tables.

How will your tables be used? Power and data choice may depend upon whether your tables will be task-specific or multipurpose. A single use may have different requirements than a multi-use configuration. Remember to consider the need for wire management and modesty panels also.

Will your needs be changing? You don't always know what your specific needs will be in the future, but you may want the ability to add power and data at a later date.

Where is the power and data source for the room? Before any power and data is specified for a table, it is important to know where the power will be coming from in your room. If you are plugging into existing outlets then the power feed for the table must be within six feet (6') of the outlet.

Have you calculated the power load? Power loads are measured in amps (abbreviated form of amperes). Your circuits will only handle so many amps so you need to know what you can safely plug in without causing an overload situation. Use the worksheet on the next page for a general idea.

Selecting Your Power and Data Options

Select the best power and data option based on your particular need and application.

Henri
¬ pop-up feature is cool
¬ when not in use, there is nothing to obstruct the use of the table surface
¬ when popped-up, provides immediate access for laptop computers
¬ surface access for conference tables
¬ safe and easy to operate
¬ easy to set up and take down with tables
¬ voice and data connections built in
¬ plugs into a standard 15 amp grounded outlet plug

Powerlink Single Circuit
¬ choice of locations
  • above surface, great for laptops
  • below surface facing out for semi-permanent computer applications
    (not available on some models)
  • below surface facing user with grommets for permanent computer applications
    (not available on some models)
¬ all the above can be changed without tools
¬ move power and data from table to table in different locations
¬ remove Powerlink and seat people on both sides of the table without interference
¬ integrated cable storage eliminates need for wire baskets or managers
¬ add Powerlink to Versteel tables in the future
¬ electrical sequencing direction can be changed by flipping internal power bars
¬ safe and easy to operate
¬ voice and data connections built in
¬ plugs into standard 15 amp grounded outlet plug

Alternate Power & Data Units

Alternate UL listed power and data units from other companies can be installed in Versteel tables. To ensure a proper fit in the top, supplier name, exact model number and cut-out template information must be provided with purchase order. When using power and data units from alternate sources, the table will not be UL listed.

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

Amp Load Worksheet

Use this worksheet to get an approximate value of the amps you will be using. If there is any risk that the circuits may not be able to carry the load, contact a qualified electrician. Also, always consult any local codes or restrictions concerning power.

Technical Specifications

Wiring of voice and data jacks is the sole responsibility of the customer

Henri provides pop-up power and voice and data access. A built-in opening is provided for cables to be routed below the surface while up. Henri for linked table groups are powered from a single 9' cord, 15 amp standard grounded outlet plug with a circuit breaker and power surge protector. Voice and data plates can be ordered with one (1) high speed voice CAT3 and one (1) data CAT6 hardwire jacks as standard. LED light indicates when power is on. Optional data plates can be specified to accommodate other voice and data suppliers, contact Versteel Customer Service for details prior to order placement.

UL Listing requires the limitation of eight (8) Henri units (two plugs per Henri) on a single plug power entry.

Based on the National Electrical Code, it is not recommended to exceed a 12 amp equipment load per power infeed. See chart with amp load worksheet on page 55.

Each Henri is shipped installed in the table top and includes all necessary cables and cord mounting clips in order to complete the electrical installation. Henri is not retrofittable. However, if a brush grommet has been previously installed in your table, then it is possible to insert a Henri at a future date.

Henri Planning and Locations

CONSIDER

How many Henri units in each table?

Where are the power and data sources in the room?

Are the tables within a six foot (6') radius of the power sources?

What are the expected table configurations of the room?

Provide a sketch of your table configuration indicating the power/data sources in the room and Versteel Customer Service will verify or help you specify the power/data solution that will best suit your needs.

Common table configurations with standard power and data locations may be found in the electrical planning section on pages 54-68.

Custom Location Print

Below are three easy steps for supplying a print that places Power & Data units in a custom location.

Step 1

Indicate where you want your Power & Data units located in the top. Use center lines for marking positions. Versteel will review your location requests to make sure that they do not interfere with base locations and their attachment.

Step 2

Indicate the face of all Power & Data units to determine which way the power outlets, voice jacks and data jacks will be accessed.

Step 3

Indicate where the Power & Data sources are located within the space. The orientation of the table(s) within the space will also help to determine the best possible access point.

It's that simple. Call Versteel Customer Service if you have any questions regarding Power & Data Custom Locations.

Single Circuit Powerlink Technical Specifications

Powerlink provides horizontal power, voice and data access as well as cable management.
Powerlink Single Circuit system allows several tables to be powered from a single 15 amp standard grounded outlet plug which will power up to eight (8) duplex outlets per sequence. Circuit breakers and power surge protectors for single or sequenced Powerlinks are at the infeed.

UL Listing requires the limitation of eight (8) Powerlink 42" and 48" length (two plugs per Powerlink) or four (4) Powerlink 60", 72", 84" and 96" length (4 plugs per Powerlink) on a single plug power entry.

Single Circuit and Powerlink Technical Specifications
Voice and data plates are installed in the Powerlink cover with one (1) high speed voice CAT3 and one (1) data CAT6 hardwire jacks as standard. Data plates can be specified to accommodate other voice and data suppliers, contact Versteel Customer Service for details prior to order placement.

Mounting lever locks are factory installed in the bottom front edge of the table. Powerlink installs without the use of tools, in the above table top facing user, below table top facing out or below table top facing user positions.

Each Powerlink unit includes all necessary hardwire connection or flex conduit jumpers, covers and hardware to complete the electrical installation.

Powerlink may be retrofitted to Versteel Class E tables only. Check your Versteel table product label located on the underside of the table top to determine if your table is Class E.

Based on the National Electrical Code, it is not recommended to exceed a 12 amp equipment load per power infeed. See amp load worksheet on page 55.

Planning and Locations

Provide a sketch of your table configuration indicating the power/data sources in the room and Versteel Customer Service will help you specify the power/data solution that will best suit your needs.

Common table configurations with standard power and data locations may be found in the electrical planning section on pages 54-68. Powerlink will always be top mounted facing user unless specified differently.

Technical Specifications, Power and Data Globe

Wiring of voice and data jacks is the sole responsibility of the customer.

Power and Data Globe provides power, voice and data access. Power and Data Globe is powered from a 15 amp standard 6' grounded outlet plug. Voice and data section ships with one (1) high speed voice CAT3 and one (1) data CAT5e Lucent® (Avaya) hardwire jacks as standard. Data plate adapters are supplied to accommodate other voice and data suppliers, contact Versteel Customer Service for details prior to order placement.

Each Power and Data Globe is field installed in a prepositioned hole in the table top. Power and Data Globe is not retrofittable. However, if a 3½" round grommet has been previously installed in your table, then it is possible to insert a Power and Data Globe at a future date.

Power Source Outlet

Power Source Outlets provide power access to individual tables through a single circuit with one (1) 15' cord and a standard grounded plug. Power Source Outlets have six (6) grounded electrical outlets per unit with surge protection and are controlled by an illuminated On/Off switch. Unit is field installed and retrofittable.

Planning and Locations

Provide a sketch of your table configuration indicating the power/data sources in the room and Versteel Customer Service will help you specify the power/data solution that will best suit your needs.

Note: Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact customer service if you have specific application concerns or questions.
