## FEATURES

**All tops are 1<sup>5</sup>/<sub>8</sub>" (4 cm) thick**

<b>SOLID WOOD</b>	Tops and cases are constructed of solid wood glued boards – only the most attractive sections of the timber are processed to the highest quality standards.	
<b>Characteristics</b>	One should not forget, however, that every tree is a unique creation of nature, so that the color, shade, and structure may well differ from one item of furniture to the next. An item of furniture in solid wood reveals the character and history of a mature tree that may have been 50 to 100 years old: small knots, variations in the growth pattern, and fine cracks caused by the wind are natural features of genuine solid wood furniture. The underside of the table differs from the top, since individual planks are positioned with any knots or less desirable grain effects concealed.	
<b>Temperature Caution</b>	Solid wood is a living product, so that slight surface irregularities are to be regarded as normal when the climate changes (i.e. when the room is heated or when the summer is cool and wet). The optimal atmospheric humidity, summer and winter, is approximately 55%. Electrical equipment that generates heat, such as computers, lamp transformers, etc., must not be placed directly on a solid wood surface. Their heat dries out the wood excessively at the contact area, and may cause it to split. Use the "Alucobond" underlay in such cases. Sideboards, Highboards, and slideboards constructed of painted MDF are suggested to be used when placing equipment inside.	
<b>Solid Wood Selections</b>	Standard offering is Elm, Sycamore, and American Walnut. Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time	
<b>Elm</b>	<b>-EE</b>	The heartwood of the elm has a brown to slightly reddish coloring. The growth rings are a prominent visual feature. The sapwood is much paler, and it is this contrast that gives the wood its strong textured effect.
<b>Oak</b>	<b>-OA</b>	Oak's color scale ranges from yellowish-brown to mid-brown. It is a very hard and durable wood.
<b>Sycamore</b>	<b>-SS</b>	The sycamore is steam-treated, which brings out its warm, reddish color. Alternating lighter and darker areas with a calm, strongly linear grain pattern make this wood unique and unmistakable.
<b>Walnut</b>	<b>-WW</b>	American walnut's heartwood is chocolate to violet-brown in color, with a darker overall effect than is obtained with European walnut.
<b>Surface Finishes</b>	<p>TIX is available in several surface treatments according to item. These surfaces are applied to protect the wood against dirt. A decision on the advantages and disadvantages of a particular surface treatment has to be taken individually and will also depend on the customer's personal views and preferences. There are practical considerations such as the amount of effort that has to be devoted to subsequent care, but also more subjective factors such as a pleasant "feel", the visual effect of the wood surface and the patina. It is important to consider all of these aspects of surface treatment before a final decision is made.</p> <p>Tops are standard with a clear lacquer finish – a natural linseed oil finish may be specified at no upcharge Cases are standard in the clear lacquer or three painted finishes are offered for a lower price point – natural linseed oil finish may be specified at no upcharge</p>	
<b>Lacquer</b>	<p>Standard is a clear coat of lacquer that is applied to the raw wood to enhance the natural characteristic of the wood and add a protective coating.</p> <p><b>No stains are available on any wood species – coloration is arrived by using different types of wood</b></p>	
<b>Linseed Oil</b>	<p>Optional Finish - <b>TIX-Oiled Finish</b> - A natural linseed oil is applied in several coats on raw wood – SPECIFY AT TIME OF ORDER This finish will have to be reapplied as it dries out on the product - so extended care is necessary Initial order with this finish has a touch-up kit included - for oil replacement purchase locally boiled linseed oil</p>	
<b>Paints</b>	<b>-PT</b>	<p>Available only on cases – Satin matte paint finish on MDF or chipboard as a backing material – at a lower price point Two-component polyurethane paint, light-fast and non-marking Specify color at time of order – <b>TIX-Snow White, TIX-Black, TIX-Deep Grey</b></p>
<b>Legs</b>	<p>TIX is available with different leg designs:</p> <p>"T" and "X" legs - anodized, extruded aluminum - available on desks "I" legs - steel panels - silver powder coat on steel ONLY - available on conference tables "I" legs - brushed aluminum panels - available on sideboard, highboards, and slideboards "I" legs - wood leg and connector to replace aluminum</p>	
<b>Positioning</b>	The legs/bases are positioned in the workshop in such a way that the stability and overall appearance match the size of the table – positions of legs as standard are shown throughout price list. However, the customer can also specify how the bases and legs should be positioned, for example to make allowance for the number and size of chairs or floor power/data monuments.	
<b>Aluminum</b>	Drawer fronts and back panels on cases are of solid aluminum with a brushed surface and a natural anodized finish Optional veneer covered aluminum drawer & door fronts are available, contact factory	
<b>Locks</b>	Cases have central barrel-type locking and are standard on all with standard lock locations – refer to individual item in price list Locks may be keyed alike – MUST BE SPECIFIED AT TIME OF ORDER	
<b>Custom</b>	TIX is always built individually to order, so that suitable special dimensions may be chosen for all items from a small console to a 50-person conference table. For special projects, please consult the factory in advance – we will gladly provide the necessary support for your space and product planning	

**Solid Wood**

ELM Solid Wood

OAK Solid Wood

SYCAMORE Solid Wood

WALNUT Solid Wood

*Standard in Lacquer - **TIX-Oiled** finish is an option, no upcharge*

**CONFERENCE TABLE FEATURES** All tops are 1 5/8" (4 cm) thick

**Concept** Rectangular Conference Tables are designed with center joint line lengthwise of a two-piece solid wood top. The center joint line is a design feature that emphasizes the length of the rectangle and also allows the base to be seen through the table top. This joint, however, has an interesting additional function. It provides innovative options for electrical wiring and power sockets. The joint line can be opened and closed by separating the two halves of the table to drop wires into the optional cable trough.

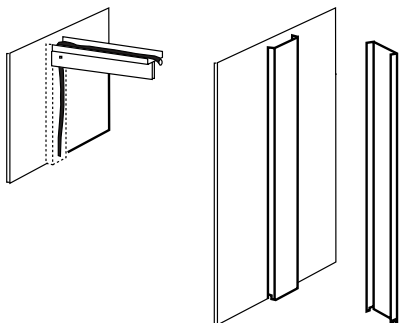

**Legs** "I" legs - steel panels - silver powder coat on steel standard / Wood legs are available conference tables  
**Single Table** - standard with two "I" legs  
**Double Table** - standard with two "I" legs and center leg has larger leg that offers wire management down both sides of leg - both panels may be removed to access wires

**Positioning** The legs/bases are positioned in the factory in such a way that the stability and overall appearance match the size of the table – positions of legs as standard are shown throughout the price list. However, the customer can also specify how the bases and legs should be positioned, for example to make allowance for the number and size of chairs or floor power/data monuments.

**Woods & Finishes** Standard offering is Elm -**EE**, Oak -**OA**, Sycamore -**SS**, and American Walnut -**WW**.  
 Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time.  
 Lacquer finish standard – Optional finish: **TIX- Oiled Finish** - specify at time of order

**Custom** All TIX conference tables have a Custom Model Number that can be used when ordering a different size or shape from the standard offering  
 Quotation request for customs should be forwarded to the factory  
 Lead time will vary according to complexity of special

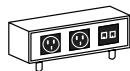

**Accessories** Several accessory items are available –

**TIX-8200-CDH** Cable Duct - horizontal - 51 1/4 (130) L x 6 1/4 (16) D x 2 (5) H - at **\$1079** List  
**TIX-8400-CDH** Cable Duct - horizontal - two pieces - 51 1/4 (130) L x 6 1/4 (16) D x 2 (5) H - at **\$2188** List  
**TIX-8260-CDH** Cable Duct - horizontal - 55 1/8 (140) L x 6 1/4 (16) D x 2 (5) H - at **\$1213** List  
**TIX-8320-CDH** Cable Duct - horizontal - 63 (160) L x 6 1/4 (16) D x 2 (5) H - at **\$2156** List

**TIX-8100-CDV** Cable Duct - vertical - at **\$599** List  
 Wire management vertical trough connects to inside of leg - 6 3/8 (16) W x 2 (5) D x 25 1/4 (64) H  
 Silver powder coated steel to match leg

**TIX-8100-PB** Plug Box - aluminum box with two power plugs and two RJ45 data ports each side - 11 3/4 (30) L x 3 1/4 (8) D x 3 (8) H - at **\$4586** List  
 Slides in center joint of conference table - tables open up to place plug through  
 Should specify at least the Cable Duct - vertical to manage wires to floor and preferably Cable Duct - horizontal for management across top  
 Recessed power boxes or trough power / wire management are available. Contact factory
