TABLES

VERSTEEL

Tops

Eliga X base tables are available in round and square top shapes. Rectangle, racetrack, boatshape and arc boatshape top shapes are available with the E-series tables, and the End-Sit tables are standard with rectangle top shapes. The laminate and veneer tops in the Eliga series are 1" thick with square corners.

Bases

The X base is constructed of a single square tube upright with four Eliga shaped feet. The E-Series and End-Sit table bases feature a parallelogram tube construction. The round and square tops can be specified with fixed or tilt bases in either 29" standard table height or 42" stand-up table height. The standard table height for the E-series and End-Sit tables is 29". When End-Sit tables are configured in a group setting the angles of the legs permit comfortable "end-seating" by creating a cove where the user can nest.

Modesty Panels

The 24" and 30" wide tables with four post legs may be specified with or without a modesty panel. The rectangle sliding table has a fixed modesty panel.

Features + Options

Tables are standard with nylon adjustable glides. Optional casters and table link are available where applicable. See individual pricing pages for additional available features such as fixed or slim tilt bases and sliding tops. Base and top options can also be found on page 72.

Power + Data

To complete your specification, power and data along with wire management options can be added to your table. Refer to the Power + Data Price List. All End-Sit bases feature an integrated wire manager in the leg.

Whiteboard

To complete your training room or collaborative environment an Eliga mobile whiteboard can be added to your specification. The whiteboard features dual-wheel locking casters, generous two-sided magnetic dry erase writing surface and a shelf on each side for marker and eraser storage. Whiteboard is available in all Versteel powder coat colors.

Laminate and Veneer, Standard Core Construction

The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped pre-drilled for field installation of bases and accessories.

Laminate Modesty, General Core Construction

The modesty panel is constructed of $\frac{7}{8}$ " thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. See individual styles below for panel heights per series. Modesty panel extends the length of the top and is located along the front edge of the table for maximum leg and knee clearance.

Fixed Modesty (FixMod XM)

The Fixed Modesty panel is mounted to the top with screws through steel brackets and must be field installed into pre-drilled positions in the top. Panel is 10" high with the following exceptions: Eliga (EI bases) 7", Paces and Vela 8". All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

Removable Modesty (RemMod RM)

The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Panel is 10" high with the following exceptions: Eliga (EI bases) 7", Paces and Vela 8". Finish details match the top unless specified differently.

**Hanging Modesty (HangMod HM)**

The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. All hanging modesty panels are 8½" high. Finish details match the top unless specified differently.

**Form Metal Modesty, General Construction**

The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

Fixed Form Modesty (FixFormMod XF)

The Fixed Form Modesty panel is mounted to the top with screws through steel brackets. The fixed modesty panel must be field installed into pre-drilled positions in the top. All mounting hardware is packed with the modesty panel. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available. The panel will be radius with round holes.

Fixed Lightweight Form Modesty**(FixLightweightFormMod XL)**

The Fixed Lightweight Form Modesty panel is a lightweight version of the Versteel Form Modesty. It is a formed steel perforated panel that is mounted to the top with screws through steel brackets. It must be field installed into pre-drilled positions in the top. A deep channel in the back of the panel allows for the routing of power and data cables inside of the modesty. Mounting hardware is packed with the modesty panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available. The panel will be radius with round holes.

Removable Lightweight Form Modesty**(RemLightweightFormMod RL)**

The Removable Lightweight Form Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to secure the modesty in position or loosen them to remove the panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.
