

CONVENTION STACKERS

HIGH-DENSITY CONVENTION STACKER

Nothing else quite stacks up.

MTS has taken stackable seating to a whole new level with these High-Density Convention Stackers. Designed to stack up to 16 high and available in five back shapes, over 30 standard powdercoat colors or optional plated finishes, they feature a solid curved silhouette back, a solid flat waterfall seat, premium metal-base glides, stack bars and a 12-year structural frame warranty.

HD Convention Stackers stack leg-on-leg up to 16 high.

All MTS High-Density Stackers are available with the optional MTS Convention Wire Ganger, providing straight rows for safe egress in the event of an emergency evacuation.

ProBax
Advanced Seating Technology

Optional ProBax®-infused, foam-based seating has been medically proven to improve posture and alertness – an advantage that provides a comforting way to set your facility apart from the rest.

Ultra-light option: If reducing chair weight and housemen's fatigue is your goal, specify "UL" after the model number for our ultra-light option, which lowers the overall chair weight to 14.7 lbs. or less based on the specific chair model selected.

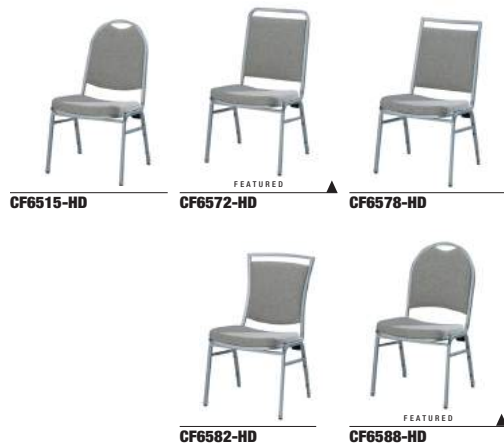

Specifications*

Model	W	D	H
6515-HD	19¼"	23¼"	36"
6572-HD	19¼"	23½"	36"
6578-HD	19¼"	23¾"	35½"
6582-HD	19¼"	23¾"	35¾"
6588-HD	19¼"	24"	36"

HIGH-DENSITY COMFORTflex® CONVENTION STACKER

MTS COMFORTflex® high-density stackers feature a contoured back and contoured COMFORTweb® seat, and the patented MTS COMFORTflex system that allows the seat and back to flex in unison for hours of comfortable support.

HD Convention Stackers stack leg-on-leg up to 16 high.

All MTS High-Density Stackers are available with the optional MTS Convention Wire Ganger, providing straight rows for safe egress in the event of an emergency evacuation.

Optional ProBax®-infused, foam-based seating has been medically proven to improve posture and alertness – an advantage that provides a comforting way to set your facility apart from the rest.

***Ultra-light option:** If reducing chair weight and housemen's fatigue is your goal, specify "-UL" after the model number for our ultra-light option, which lowers the overall chair weight to 19 lbs. or less based on the specific chair model selected.

600 SERIES CONVENTION STACKER

Chairs that call for an audience.

With superior stackability, easy ganging and long-term durability – our 600 Series Convention Stackers provide comfort through fully contoured seats and backs and are engineered with 3/4", 16 gauge square steel tubing, striking the perfect balance between form and function.

675
Plated finishes only. Chrome standard. Satin nickel chrome optional.

676
Plated finishes only. Chrome standard. Satin nickel chrome optional.

677
Powdercoat finishes standard. Plated finishes optional.

678
Powdercoat finishes standard. Plated finishes optional.

600 Series Convention Stackers stack leg-on-leg up to 10 high.

Specifications

Model	W	D	H
675	21"	21½"	33¼"
676	21"	22"	36"
677	21"	21½"	33¼"
678	21"	22"	36"

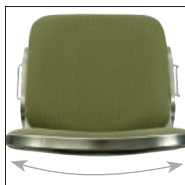

Standard Features

Models 675 and 676 are designed with the MTS patented Stacker-Ganger bracket. This structural component ensures secure stacking and ganging, keeping chairs together when the row is pushed or tipped.

Models 677 and 678 come with a standard stacking bar that helps chairs stack squarely, reducing wear and tear on seat upholstery.

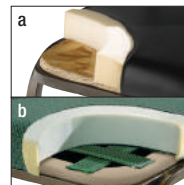

All 600 Series models feature a contoured back and seat design for added support and improved seating comfort.

Optional

The optional MTS Wire Ganging Device can be added to models 677 and 678 to provide straight rows in convention seating situations.

a. A flat waterfall style seat is optional on models 677 and 678. Specify USS.
b. An optional COMFORTweb® flat seat is available on models 677 and 678. Specify CWS.

ProBax®-infused, foam-based seating has been medically proven to improve posture and alertness – an advantage that provides a comforting way to set your facility apart from the rest.

**New high density (HD) convention stack chairs*

Nothing stacks up like MTS.

MTS offers a wide variety of storage and handling options for the entire collection of stackable seating. The collection is highlighted by the custom manufactured 020 storage cart, each designed to carry approximately 75-100 chairs. Each cart is designed and precisely manufactured to fit your facility requirements and customer order specifications. Stackable up to three carts high, these heavy-duty, high-volume storage carts make storage and handling in large facilities quick and easy. With the addition of individual hand trucks, also manufactured series-specific for precise handling and transport, the 020 custom storage carts are a breeze to load and unload.

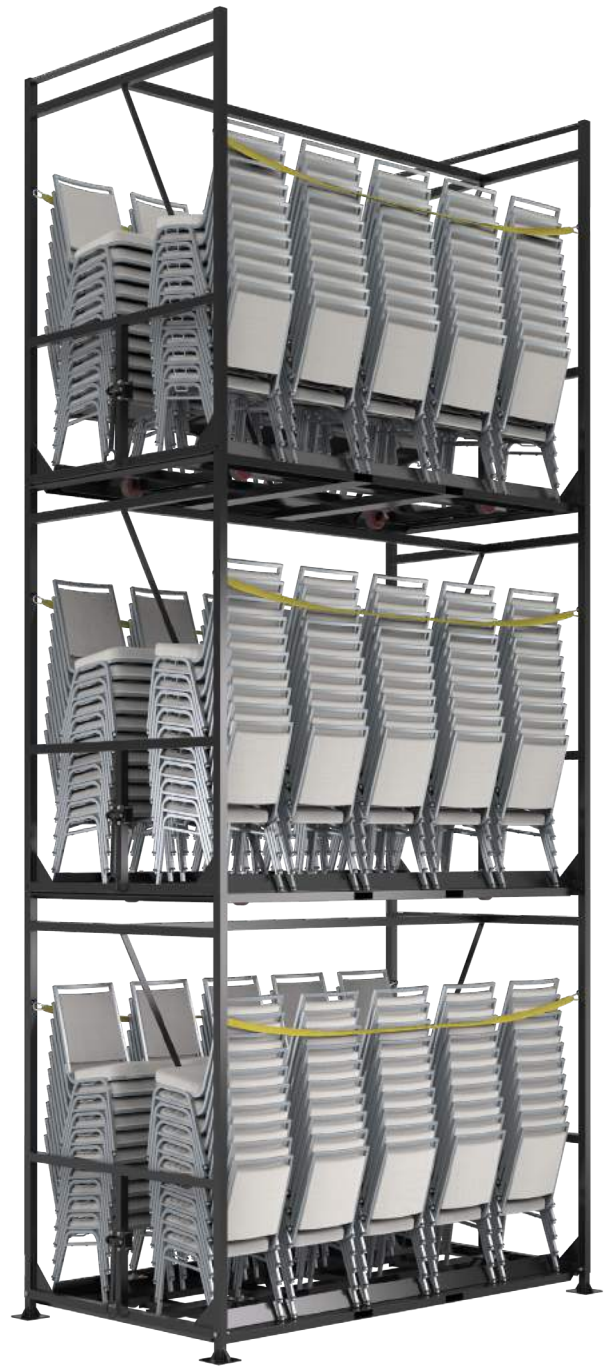

025 Storage Cart

The MTS 025 Storage Cart offers similar features and options as the MTS 020 Storage Cart. Constructed of lighter gauge steel for less overall weight than our heavy duty 020 Storage Cart. The 025 Storage Cart stacks two high.

025KD Storage Cart

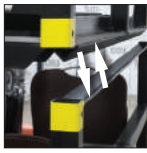

The MTS 025KD is perfect for facilities where access is limited. Shipped knocked down, this cart features easy nut and bolt assembly. This storage cart offers similar features and options as the MTS 020 Storage Cart. Constructed with the same materials as our 025 Storage Cart. The 025KD Storage Cart stacks two high.

020 Storage Cart

The MTS flagship of storage carts. Custom built to match your facility specifications, the MTS 020 Storage Cart can store up to 300 stack chairs when stacked three high – all in the footprint of one cart.

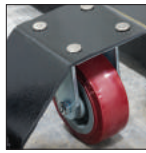

020, 025 and 025KD Features and Options

"V" Channel design allows carts to stack straight and securely with ease.

Optional jack stands are required when stacking carts.

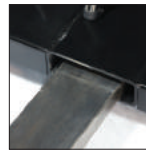

All storage carts come standard with two swivel, and two fixed, 5" heavy-duty casters.

U-style leg rails safely hold chair legs in place and keep chair stacks from slipping or sliding off the cart.

Safety straps with quick-release clips keep the stacks from tipping during transport. Standard on all storage carts.

Forklift channels, manufactured from industry-standard 6" tube stock to accept forks up to 5 1/2" wide, are designed to ensure the stability of the cart during transport and also to protect the chairs from "fork" damage.

An optional tow ring is available offering a variety of transport options.

Optional protective rubber bumpers are available to protect walls and hallways during transportation. Specify PBE.

Each MTS stackable seating series has its own series-specific hand truck, manufactured to transport up to 16 chairs high (depending on the series).

Get the upper hand on storage

The MTS Multi-Tier Storage System is designed to reduce set-up costs, improve safety and save storage space. The heavy-duty structural steel tubular frames, high-load capacity casters and neoprene rubber padded storage containment structures make these trucks one of the best long-term investments in the hospitality industry. When used with a specially engineered, multilevel, drive-in storage rack structure, a high-capacity storage system can reduce your floor space requirements by as much as fifty percent. Ask your sales representative if our Multi-Tier Storage System makes sense for your facility.

The MTS Multi-Tier Storage System Features:

- 1½" x 3", 14 gauge, welded steel tube frame
- 1¼" dia., 14 gauge end frames and handles
- Neoprene-padded, inclined bed, design ensures stacking stability
- 6" dia. x 2" wide, polyolefin casters (two rigid, two swivel with brakes)
- Optional towing bars with gravity-storage position lock
- Designed for forklift handling

The MTS Multi-Tier Storage System is a turn-key storage solution custom designed to handle all of your tables and chair storage needs.

Staging Products

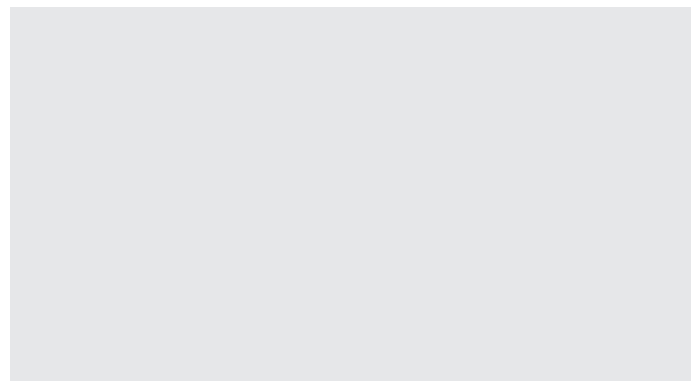

MTS Seating is sensitive to the impact of our manufacturing on the world around us. That's why we developed and adopted the SynerGreen® philosophy to make continuous environmental improvements in our processes and products, while practicing sound business principles to focus on satisfying customer needs. In addition, MTS is proud to be the first hospitality banquet seating manufacturer to earn the GREENGUARD® Indoor Air Quality Certification on our line of stacking, banquet and restaurant seating, and in 2014, MTS received Sustainability Leader status with the MindClick Global Hospitality Sustainability Index.

Visit our website at mtsseating.com to find out more about our SynerGreen program and for the big picture in turnkey solutions for every seating setting.

Discover performance engineering, ergonomics today's hospitality industry demands, and the design impact to make a lasting statement – whimsical to romantic, retro to regal.
